

Field	Description	Data Type
booking_id	Booking ID	String
mem_id	Patient ID	String
doctor_id	Doctor ID	String
consult_waived_reason	Reason for waiver of consultation fee for booking	String
is_mc_issued	Whether MC was issued in booking	Integer (binary)
mc_days	Number of days of MC given during booking	Integer
is_referral_letter_issued	Whether referral letter was issued in booking	Integer (binary)
booking_timestamp	Timestamp of booking	Timestamp
gender	Patient's gender	String
birth_year	Patient's birth year	Integer
diagnosis_code_list	List of diagnosis codes that patient was diagnosed with during booking	List
diagnosis_list	List of diagnosis names that patient was diagnosed with during booking	List
chronic_list	List of chronic diagnosis group that patient was diagnosed with during booking	List
count_diagnosis	Count of diagnosis codes that patient was diagnosed with during booking	Integer
count_chronic	Count of chronic diagnosis group that patient was diagnosed with during booking	Integer
medicationID_list	List of medication IDs that patient was prescribed during booking	List
medicationName_list	List of medication names that patient was prescribed during booking	List
medQuantity_list	List of medication quantities that patient was prescribed during booking	List
medAndQuan_list	List of medication names and quantities that patient was prescribed during booking	List
count_medication	Coun of number of medication IDs that patient was prescribed during booking	Integer
count_repeatmed	Count of medication IDs where patient was prescribed repeated medication (eg. prescribed in p	Integer
SymptomID_list	List of symptoms IDs that patient exhibited during booking	List
SymptomName_list	List of symptoms names that patient exhibited during booking	List
count_SymID	Count of symptoms IDs that patient exhibited during booking	Integer
diag_H57	Whether patient was diagnosed with category code H57 during booking	Integer (binary)
diag_M23	Whether patient was diagnosed with category code M23 during booking	Integer (binary)

Field	Description	Data Type
diag_T88	Whether patient was diagnosed with category code T88 during booking	Integer (binary)
diag_L20	Whether patient was diagnosed with category code L20 during booking	Integer (binary)
diag_R51	Whether patient was diagnosed with category code R51 during booking	Integer (binary)
diag_N94	Whether patient was diagnosed with category code N94 during booking	Integer (binary)
diag_G44	Whether patient was diagnosed with category code G44 during booking	Integer (binary)
diag_M79	Whether patient was diagnosed with category code M79 during booking	Integer (binary)
diag_J02	Whether patient was diagnosed with category code J02 during booking	Integer (binary)
diag_J06	Whether patient was diagnosed with category code J06 during booking	Integer (binary)
diag_G43	Whether patient was diagnosed with category code G43 during booking	Integer (binary)
diag_R21	Whether patient was diagnosed with category code R21 during booking	Integer (binary)
diag_M62	Whether patient was diagnosed with category code M62 during booking	Integer (binary)
diag_A09	Whether patient was diagnosed with category code A09 during booking	Integer (binary)
diag_J30	Whether patient was diagnosed with category code J30 during booking	Integer (binary)
diag_L30	Whether patient was diagnosed with category code L30 during booking	Integer (binary)
diag_T78	Whether patient was diagnosed with category code T78 during booking	Integer (binary)
diag_U07	Whether patient was diagnosed with category code U07 during booking	Integer (binary)
diag_K29	Whether patient was diagnosed with category code K29 during booking	Integer (binary)
diag_B35	Whether patient was diagnosed with category code B35 during booking	Integer (binary)
diag_K30	Whether patient was diagnosed with category code K30 during booking	Integer (binary)
diag_H81	Whether patient was diagnosed with category code H81 during booking	Integer (binary)
diag_N39	Whether patient was diagnosed with category code N39 during booking	Integer (binary)
diag_G47	Whether patient was diagnosed with category code G47 during booking	Integer (binary)
diag_Z76	Whether patient was diagnosed with category code Z76 during booking	Integer (binary)
diag_K59	Whether patient was diagnosed with category code K59 during booking	Integer (binary)
diag_H10	Whether patient was diagnosed with category code H10 during booking	Integer (binary)
diag_R42	Whether patient was diagnosed with category code R42 during booking	Integer (binary)

Field	Description	Data Type
diag_K21	Whether patient was diagnosed with category code K21 during booking	Integer (binary)
diag_S90	Whether patient was diagnosed with category code S90 during booking	Integer (binary)
diag_R50	Whether patient was diagnosed with category code R50 during booking	Integer (binary)
diag_U12	Whether patient was diagnosed with category code U12 during booking	Integer (binary)
diag_N92	Whether patient was diagnosed with category code N92 during booking	Integer (binary)
diag_M54	Whether patient was diagnosed with category code M54 during booking	Integer (binary)
diag_S60	Whether patient was diagnosed with category code S60 during booking	Integer (binary)
diag_I10	Whether patient was diagnosed with category code I10 during booking	Integer (binary)
diag_L03	Whether patient was diagnosed with category code L03 during booking	Integer (binary)
diag_K64	Whether patient was diagnosed with category code K64 during booking	Integer (binary)
diag_L98	Whether patient was diagnosed with category code L98 during booking	Integer (binary)
diag_B37	Whether patient was diagnosed with category code B37 during booking	Integer (binary)
diag_L73	Whether patient was diagnosed with category code L73 during booking	Integer (binary)
diag_H00	Whether patient was diagnosed with category code H00 during booking	Integer (binary)
diag_N76	Whether patient was diagnosed with category code N76 during booking	Integer (binary)
diag_J01	Whether patient was diagnosed with category code J01 during booking	Integer (binary)
diag_J45	Whether patient was diagnosed with category code J45 during booking	Integer (binary)
diag_E78	Whether patient was diagnosed with category code E78 during booking	Integer (binary)
diag_L02	Whether patient was diagnosed with category code L02 during booking	Integer (binary)
diag_R52	Whether patient was diagnosed with category code R52 during booking	Integer (binary)
diag_K12	Whether patient was diagnosed with category code K12 during booking	Integer (binary)
diag_K58	Whether patient was diagnosed with category code K58 during booking	Integer (binary)
diag_K07	Whether patient was diagnosed with category code K07 during booking	Integer (binary)
diag_L70	Whether patient was diagnosed with category code L70 during booking	Integer (binary)
diag_Z71	Whether patient was diagnosed with category code Z71 during booking	Integer (binary)
diag_S63	Whether patient was diagnosed with category code S63 during booking	Integer (binary)

Field	Description	Data Type
diag_M25	Whether patient was diagnosed with category code M25 during booking	Integer (binary)
diag_K05	Whether patient was diagnosed with category code K05 during booking	Integer (binary)
diag_E03	Whether patient was diagnosed with category code E03 during booking	Integer (binary)
diag_L50	Whether patient was diagnosed with category code L50 during booking	Integer (binary)
diag_W57	Whether patient was diagnosed with category code W57 during booking	Integer (binary)
diag_H93	Whether patient was diagnosed with category code H93 during booking	Integer (binary)
diag_H01	Whether patient was diagnosed with category code H01 during booking	Integer (binary)
diag_E11	Whether patient was diagnosed with category code E11 during booking	Integer (binary)
diag_S13	Whether patient was diagnosed with category code S13 during booking	Integer (binary)
diag_F41	Whether patient was diagnosed with category code F41 during booking	Integer (binary)
diag_R53	Whether patient was diagnosed with category code R53 during booking	Integer (binary)
diag_O91	Whether patient was diagnosed with category code O91 during booking	Integer (binary)
diag_H02	Whether patient was diagnosed with category code H02 during booking	Integer (binary)
diag_R11	Whether patient was diagnosed with category code R11 during booking	Integer (binary)
diag_S93	Whether patient was diagnosed with category code S93 during booking	Integer (binary)
diag_L24	Whether patient was diagnosed with category code L24 during booking	Integer (binary)
diag_J39	Whether patient was diagnosed with category code J39 during booking	Integer (binary)
diag_J32	Whether patient was diagnosed with category code J32 during booking	Integer (binary)
diag_B00	Whether patient was diagnosed with category code B00 during booking	Integer (binary)
diag_L64	Whether patient was diagnosed with category code L64 during booking	Integer (binary)
diag_Y42	Whether patient was diagnosed with category code Y42 during booking	Integer (binary)
diag_R10	Whether patient was diagnosed with category code R10 during booking	Integer (binary)
diag_M10	Whether patient was diagnosed with category code M10 during booking	Integer (binary)
diag_M75	Whether patient was diagnosed with category code M75 during booking	Integer (binary)
diag_Z02	Whether patient was diagnosed with category code Z02 during booking	Integer (binary)
diag_J03	Whether patient was diagnosed with category code J03 during booking	Integer (binary)

Field	Description	Data Type
diag_R07	Whether patient was diagnosed with category code R07 during booking	Integer (binary)
diag_K13	Whether patient was diagnosed with category code K13 during booking	Integer (binary)
diag_Z30	Whether patient was diagnosed with category code Z30 during booking	Integer (binary)
diag_P39	Whether patient was diagnosed with category code P39 during booking	Integer (binary)
diag_R22	Whether patient was diagnosed with category code R22 during booking	Integer (binary)
diag_H60	Whether patient was diagnosed with category code H60 during booking	Integer (binary)
diag_B02	Whether patient was diagnosed with category code B02 during booking	Integer (binary)
diag_L29	Whether patient was diagnosed with category code L29 during booking	Integer (binary)
diag_E05	Whether patient was diagnosed with category code E05 during booking	Integer (binary)
diag_N64	Whether patient was diagnosed with category code N64 during booking	Integer (binary)
diag_R05	Whether patient was diagnosed with category code R05 during booking	Integer (binary)
diag_L60	Whether patient was diagnosed with category code L60 during booking	Integer (binary)
diag_S80	Whether patient was diagnosed with category code S80 during booking	Integer (binary)
diag_M65	Whether patient was diagnosed with category code M65 during booking	Integer (binary)
diag_J22	Whether patient was diagnosed with category code J22 during booking	Integer (binary)
diag_O21	Whether patient was diagnosed with category code O21 during booking	Integer (binary)
diag_M72	Whether patient was diagnosed with category code M72 during booking	Integer (binary)
diag_L23	Whether patient was diagnosed with category code L23 during booking	Integer (binary)
diag_K52	Whether patient was diagnosed with category code K52 during booking	Integer (binary)
chronic_NoneChronic	whether patient was diagnosed with no chronic disease group (binary value)	Integer (binary)
chronic_Atopic dermatitis	whether patient was diagnosed with the chronic disease Atopic dermatitis	Integer (binary)
chronic_Migraine	whether patient was diagnosed with the chronic disease Migraine	Integer (binary)
chronic_Vasomotor and allergic rhinitis	whether patient was diagnosed with the chronic disease Vasomotor and allergic rhinitis	Integer (binary)
chronic_Gastro-oesophageal reflux disease	whether patient was diagnosed with the chronic disease Gastro-oesophageal reflux disease	Integer (binary)
chronic_Hypertension	whether patient was diagnosed with the chronic disease Hypertension	Integer (binary)
chronic_Asthma	whether patient was diagnosed with the chronic disease Asthma	Integer (binary)

Field	Description	Data Type
chronic_Hyperlipidaemia	whether patient was diagnosed with the chronic disease Hyperlipidaemia	Integer (binary)
chronic_Thyroid	whether patient was diagnosed with the chronic disease Thyroid	Integer (binary)
chronic_Diabetes	whether patient was diagnosed with the chronic disease Diabetes	Integer (binary)
chronic_Gout	whether patient was diagnosed with the chronic disease Gout	Integer (binary)
symp_others	whether patient exhibited the symptom others	Integer (binary)
symp_medical referral	whether patient exhibited the symptom medical referral	Integer (binary)
symp_headache	whether patient exhibited the symptom headache	Integer (binary)
symp_giddiness	whether patient exhibited the symptom giddiness	Integer (binary)
symp_fever	whether patient exhibited the symptom fever	Integer (binary)
symp_N	whether patient exhibited the symptom N	Integer (binary)
symp_cold sores	whether patient exhibited the symptom cold sores	Integer (binary)
symp_rash	whether patient exhibited the symptom rash	Integer (binary)
symp_sore throat	whether patient exhibited the symptom sore throat	Integer (binary)
symp_flu	whether patient exhibited the symptom flu	Integer (binary)
symp_cough	whether patient exhibited the symptom cough	Integer (binary)
symp_cold	whether patient exhibited the symptom cold	Integer (binary)
symp_vomiting	whether patient exhibited the symptom vomiting	Integer (binary)
symp_diarrhoea	whether patient exhibited the symptom diarrhoea	Integer (binary)
symp_chronic medicine top-up	whether patient exhibited the symptom chronic medicine top-up	Integer (binary)
symp_chronic illness management	whether patient exhibited the symptom chronic illness management	Integer (binary)
symp_discuss lab results	whether patient exhibited the symptom discuss lab results	Integer (binary)
Target_chronic	whether patient was diagnosed with a chronic disease	Integer (binary)
age_yr	Age of patient at booking	Integer
consult_hr	Hour of booking	Integer
